

## **Agronomist / greenhouse farmer**

**Biomix A/S, Odense**

**Do you have experience with plant cultivation? Would you like to be a part of a fast-growing start-up company, that contributes to the green transition? Then, you might be our new colleague.**

Biomix is a bioindustrial company, founded in 2021 as a spin-out from the University of Southern Denmark and the University of Western Australia. We are developing a new generation of natural, microbial solutions for agriculture, food, and health industry. Our areas of interest are biofertilisers and biopesticides for replacement of agrochemicals, as well as solutions for drought, food waste, wastewater treatment, and antimicrobial resistance.

We are a highly dedicated team of 12 employees. We are looking for a new colleague (agronomist, greenhouse farmer, or biologist with greenhouse experience), to join our rapidly growing workplace. You will become part of the plant laboratory team, working on developing microbial products for greenhouse and open field use.

### **To be qualified for the position, you must have**

- Hands-on experience in industrial cultivation of vegetables
- Research experience or knowledge of experimental setups
- A broad knowledge of plant growth
- Experience in operating greenhouses or large grow tents is an advantage
- An understanding of the end-users of our products as well as their needs and challenges
- An outgoing personality and ability to connect with greenhouse farmers
- Strong communication skills in English and Danish
- Ability to take initiative and make smart decisions

As a person, you are open minded and helpful, and a good colleague. You are passionate about sustainability and want to make a positive impact on our planet.

## The position includes

- Establishing a link to the greenhouse society
- Setting up and monitoring plant experiments in the laboratory (and in the field)
- Measuring plant growth, yield, and infection
- Being one of our go-to persons for all greenhouse-related
- Participating in training colleagues in cultivation, experimental setups, etc.
- Writing grant applications and scientific material
- Participation in conferences, tradeshow, etc.
- Laboratory safety

## What we offer

- A workplace, where collaboration and co-decision making is prioritized
- Good colleagues and a positive working environment
- An opportunity to shape the company as it grows
- Opportunities to develop your potential in other areas of interest
- An opportunity for you to contribute to the green transition
- Flexible working hours and a generous vacation package

Deadline for applications is **31/5-2022**. Applications must be submitted as **one PDF file**, containing letter of application, CV, exam papers (if relevant), and recommendations, to [job@biomix.com](mailto:job@biomix.com) . Applications are reviewed as they are received. The position is full-time, starting 1/8. We welcome international applicants, however, you must be able to attend the interview in person and have a Danish working permit starting 1/8 at the latest.
